Subject index

Adatoms,
heterogeneous electrocatalysis on well-defined platinum surfaces modified by controlled amounts of irreversibly adsorbed ———. Part III. Formic acid oxidation on the Pt (100)–Bi system (Clavilier et al.) 113
Alloy,
electroformation of a Ru + Ag surface ——— (Quiroz et al.) 409
Amperometric enzyme electrode,
——— for maltose based on an oligosaccharide dehydrogenase-modified carbon paste electrode containing *p*-benzoquinone (Ikeda et al.) 351
Anodic peak potentials,
correlation of ——— with the semi-empirical orbital and HOMO energies of various vinyl compounds (Yılmaz et al.) 105
Aromatic solvents,
metal deposition from ——— (Abbott et al.) 449

Benzonitrile,
ion transfer across the immiscible water–——— interface (Alemu, Solomon) 297
p-Benzoquinone,
amperometric enzyme electrode for maltose based on an oligosaccharide dehydrogenase-modified carbon paste electrode containing ——— (Ikeda et al.) 351
2,2′-Bipyridine,
semi-differential cyclic voltammetry of cadmium ion transfer across the water/nitrobenzene interface facilitated by ——— (Fan, Wang) 77
Bismuth,
heterogeneous electrocatalysis on well-defined platinum surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part III. Formic acid oxidation on the Pt (100)–——— system (Clavilier et al.) 113

Brain tissue,
altered response of carbon paste electrodes after contact with ———. Implications for modified electrode use in vivo (Ormonde, O'Neill) 463

Cadmium,
semi-differential cyclic voltammetry of ——— ion transfer across the water/nitrobenzene interface facilitated by 2,2′-bipyridine (Fan, Wang) 77
Carbon,
altered response of ——— paste electrodes after contact with brain tissue. Implications for modified electrode use in vivo (Ormonde, O'Neill) 463
Amperometric enzyme electrode for maltose based on an oligosaccharide dehydrogenase-modified ——— paste electrode containing *p*-benzoquinone (Ikeda et al.) 351
Chemical anisotropy,
on the utilization of ——— concepts in the analysis of rate constant values of electrodimerization reactions (Marques da Silva et al.) 237

Chemically modified electrodes,
——— with affinity to sulphydryl compounds (Katz, Solov'ev) 217
Cluster model,
ab initio ——— approach to the chemisorption on mercury. Halogens and halides (Blanco et al.) 39
On the contribution of the metal to the electrical double-layer capacity. Ab initio model calculations on lithium clusters (Mulder et al.) 273
Cobalt,
development of a cobalt oxide spinel structure overlayer on ——— electrodes. A modified electrode surface of electrocatalytic interest (Kessler et al.) 315

Cobalt oxide,
development of a ——— spinel structure overlayer on cobalt electrodes. A modified electrode surface of electrocatalytic interest (Kessler et al.) 315
Copper,
core-level analyses of the ——— c(2 × 2) lattice formed at underpotentials on the Pd (100) surface (Solomun) 229
Core-level analyses,
——— analyses of the copper c(2 × 2) lattice formed at underpotentials on the Pd (100) surface (Solomun) 229
Current function,
on the evaluation of the ——— in linear sweep voltammetry (Basha, Sangaranarayanan) 431
Cyclootadiene,
electrochemistry of iridium chelates with phenanthroline or substituted phenanthroline and ——— (Costa et al.) 189
Cytochrome *c*,
electrochemistry of ——— at a conducting polymer electrode (Bartlett, Farington) 471

Deuterium,
electrochemically induced nuclear fusion of ——— (Fleischmann, Pons) 301
Dimethyldopamine,
electrochemically controlled binding and release of protonated ——— and other cations from poly(*N*-methylpyrrole)/polyanion composite redox polymers (Zhou et al.) 147
Double-layer capacity,
on the contribution of the metal to the electrical ———. Ab initio model calculations on lithium clusters (Mulder et al.) 273

ECE mechanism,
theory of the interfacial impedance in the case of the ——— and the ECCE mechanism and its application to the electrochemical reduction of nitromethane on mercury from aqueous 1 *M* KCl at pH 9 (Rueda et al.) 23
ECCE mechanism,
theory of the interfacial impedance in the case of the ECE and the ——— and its application to the electrochemical reduction of nitromethane on mercury from aqueous 1 *M* KCl at pH 9 (Rueda et al.) 23
EDTA,
comparison of the polarographic catalytic currents of V(III)-EDTA/NO_3^- with those of V(IV)-EDTA/NO_3^- (Kato, Aoki) 309
Electrodimerization,
on the utilization of chemical anisotropy concepts in the analysis of rate constant values of ——— reactions (Marques da Silva et al.) 237

Formic acid,
heterogeneous electrocatalysis on well-defined platinum surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part III. ——— oxidation on the Pt (100)–Bi system (Clavilier et al.) 113
Fusion,
electrochemically induced nuclear ——— of deuterium (Fleischmann, Pons) 301

Gallium phosphide,
(photo-)etching of n- and p-type ——— in aqueous hypobromite solutions: a (photo-) electrochemical study (Goossens et al.) 89
Glassy carbon,
activated reduction wave of H_2O_2 at ——— electrodes pretreated by immersion in H_2O_2 solution and cathodization (Sugiyama, Aoki) 437
Gold,
effect of halothane on the reduction of oxygen on ———. A method for simultaneous determination of oxygen and halothane on a single working electrode (Tebbutt, Hahn) 205
Study of thin films of Prussian Blue on ——— electrodes, using surface plasmon–polaritons (Cowen et al.) 455

Halides,
ab initio cluster model approach to the chemisorption on mercury. Halogens and ——— (Blanco et al.) 39
Halogens,
ab initio cluster model approach to the chemisorption on mercury. ——— and halides (Blanco et al.) 39
Halothane,
effect of ——— on the reduction of oxygen on gold. A method for simultaneous determination of oxygen and halothane on a single working electrode (Tebbutt, Hahn) 205

HOMO energies,
correlation of anodic peak potentials with the semi-empirical orbital and ——— of various vinyl compounds (Yılmaz et al.) 105
Hydrogen,
electrochemically induced nuclear fusion of deuterium (Fleischmann, Pons) 309
New ideas of the mechanism of catalytic ——— evolution in the buffer solutions of organic compounds (Leibson et al.) 165
Hydrogen peroxide,
activated reduction wave of ——— at glassy carbon electrodes pretreated by immersion in H_2O_2 solution and cathodization (Sugiyama, Aoki) 437
Hypobromite,
(photo-)etching of n- and p-type GaP in aqueous ——— solutions: a (photo-)electrochemical study (Goossens et al.) 89

Impedance,
on the ——— of electrodes with rough interfaces (De Levie) 1
Some practical aspects of the numerical Laplace transformation for ——— analyses of electrochemical systems (Ye, Doblhofer) 11
Theory of the interfacial ——— in the case of the ECE and the ECCE mechanism and its application to the electrochemical reduction of nitromethane on mercury from aqueous 1 *M* KCl at pH 9 (Rueda et al.) 23
Indoles,
study of the electrochemistry of tryptophan, peptides containing tryptophan, and related compounds (———) at mercury electrodes (Tucker et al.) 127
Induction time,
computer simulation of nucleation: an understanding of the ——— (Sluyters et al.) 263
Interface between two immiscible electrolyte solutions,
ion transfer across the immiscible water–benzonitrile interface (Alemu, Solomon) 297
Photoinduced polarization of the ——— (Mareček et al.) 287
Ion transfer,
——— across the immiscible water–benzonitrile interface (Alemu, Solomon) 297
Iridium chelates,
electrochemistry of ——— with phenanthroline or substituted phenanthroline and cyclooctadiene (Costa et al.) 189

Laplace transformation,
some practical aspects of the numerical ——— for impedance analyses of electrochemical systems (Ye, Doblhofer) 11
Lead oxide,
properties of a new, low bandgap photoconducting phase of ——— (Schumacher et al.) 331
Linear sweep voltammetry,
on the evaluation of the current function in ——— (Basha, Sangaranarayanan) 431
Lithium,
on the contribution of the metal to the electrical double-layer capacity. Ab initio model calculations on ——— clusters (Mulder et al.) 273

Maltose,
amperometric enzyme electrode for ——— based on an oligosaccharide dehydrogenase-modified carbon paste electrode containing *p*-benzoquinone (Ikeda et al.) 351
Mercury,
ab initio cluster model approach to the chemisorption on ———. Halogens and halides (Blanco et al.) 39
Study of the electrochemistry of tryptophan, peptides containing tryptophan, and related compounds (indoles) at ——— electrodes (Tucker et al.) 127
Theory of the interfacial impedance in the case of the ECE and the ECCE mechanism and its application to the electrochemical reduction of nitromethane on ——— from aqueous 1 *M* KCl at pH 9 (Rueda et al.) 23
Metal,
——— deposition from aromatic solvents (Abbott et al.) 449
Metallopolymeric films,
electrochemical assembly of multicomponent, redox-conductive ——— with arbitrary three-dimensional control over macroscopic structure and chemical composition (Zhang et al.) 423
Methanol,
chemisorption of ——— on different platinum electrodes (smooth and rough polycrystalline, monocrystalline, and preferentially oriented), as studied by EMIRS (Beden et al.) 401
Methylene blue,
dimerization kinetics of ——— incorporated in a Nafion film (Kuwabata et al.) 363

Microheterogeneous catalysis,
——— in modified electrodes (Lyons et al.) 51
Microporous composite electrodes,
frequency dependence of the capacitance of ——— as probed by small amplitude triangular waveforms (Petersen et al.) 249
Microtips,
fabrication and characterization of ——— for in-situ scanning tunneling microscopy (Gewirth et al.) 477

Nafion,
dimerization kinetics of methylene blue incorporated in a ——— film (Kuwabata et al.) 363
Nitrate ion,
comparison of the polarographic catalytic currents of V(III)-EDTA/NO_3^- with those of V(IV)-EDTA/NO_3^- (Kato, Aoki) 309
Nitrobenzene,
semi-differential cyclic voltammetry of cadmium ion transfer across the water/——— interface facilitated by 2,2′-bipyridine (Fan, Wang) 77
Nitromethane,
theory of the interfacial impedance in the case of the ECE and the ECCE mechanism and its application to the electrochemical reduction of ——— on mercury from aqueous 1 *M* KCl at pH 9 (Rueda et al.) 23
Nuclear fusion,
electrochemically induced ——— of deuterium (Fleischmann, Pons) 301
Nucleation,
computer simulation of ———: an understanding of the induction time (Sluyters et al.) 263

Oligosaccharide dehydrogenase,
amperometric enzyme electrode for maltose based on an ———-modified carbon paste electrode containing *p*-benzoquinone (Ikeda et al.) 351
Orbital energies,
correlation of anodic peak potentials with the semi-empirical ——— and HOMO energies of various vinyl compounds (Yılmaz et al.) 105
Oxygen,
effect of halothane on the reduction of ——— on gold. A method for simultaneous determination of oxygen and halothane on a single working electrode (Tebbutt, Hahn) 205
Influence of platinum crystallite size on the electroreduction of ——— (Watanabe et al.) 375

Palladium,
core-level analyses of the copper c(2 × 2) lattice formed at underpotentials on the ——— (100) surface (Solomun) 229
Electrochemically induced nuclear fusion of deuterium (Fleischmann, Pons) 301
Peptides,
study of the electrochemistry of tryptophan, ——— containing tryptophan, and related compounds (indoles) at mercury electrodes (Tucker et al.) 127
Phenanthroline,
electrochemistry of iridium chelates with ——— or substituted phenanthroline and cyclooctadiene (Costa et al.) 189
Phenazine,
electroreduction of ——— studied by surface-enhanced Raman scattering (Takahashi et al.) 177
Platinum,
chemisorption of methanol on different ——— electrodes (smooth and rough polycrystalline, monocrystalline, and preferentially oriented), as studied by EMIRS (Beden et al.) 401
Electrochemically induced nuclear fusion of deuterium (Fleischmann, Pons) 301
Heterogeneous electrocatalysis on well-defined ——— surfaces modifed by controlled amounts of irreversibly adsorbed adatoms. Part III. Formic acid oxidation on the Pt (100)–system (Clavilier et al.) 113
Influence of ——— crystallite size on the electroreduction of oxygen (Watanabe et al.) 375
Voltammetry of platinized ——— electrodes in aqueous Na_2SO_4 (Franaszczuk, Sobkowski) 223
Polaritons,
study of thin films of Prussian Blue on gold electrodes, using surface plasmon–——— (Cowen et al.) 455
Polymer electrode,
electrochemistry of cytochrome *c* at a conducting ——— (Bartlett, Farington) 471

Poly(*N*-methylpyrrole)/polyanion,
electrochemically controlled binding and release of protonated dimethyldopamine and other cations from ——— composite redox polymers (Zhou et al.) 147
Potassium chloride,
theory of the interfacial impedance in the case of the ECE and the ECCE mechanism and its application to the electrochemical reduction of nitromethane on mercury from aqueous 1 *M* ——— at pH 9 (Rueda et al.) 23
Prussian Blue,
study of thin films of ——— on gold electrodes, using surface plasmon–polaritons (Cowen et al.) 455
Pyrrole derivative,
first electrochemical study of a modified electrode obtained from a 3-functionalized ——— (Andrieux, Audebert) 443

Rate constant,
on the utilization of chemical anisotropy concepts in the analysis of ——— values of electrodimerization reactions (Marques da Silva et al.) 237
Rhodium,
voltammetric study of polycrystalline ——— in alkaline solutions at different temperatures (Cataldi et al.) 61
Rough interfaces,
on the impedance of electrodes with ——— (De Levie) 1
Ruthenium,
electroformation of a ——— + Ag surface alloy (Quiroz et al.) 409

Scanning tunneling microscopy,
fabrication and characterization of microtips for in-situ ——— (Gewirth et al.) 477
Silver,
electroformation of a Ru + ——— surface alloy (Quiroz et al.) 409
Formation and electroreduction of silver sulfide films at a ——— metal electrode (Hepel et al.) 389
Silver sulfide,
formation and electroreduction of ——— films at a silver metal electrode (Hepel et al.) 389
Small amplitude triangular waveforms,
frequency dependence of the capacitance of microporous composite electrodes as probed by ——— (Petersen et al.) 249
Sodium sulphate,
voltammetry of platinized platinum electrodes in aqueous ——— (Franaszczuk, Sobkowski) 223
Spinel,
development of a cobalt oxide ——— structure overlayer on cobalt electrodes. A modified electrode surface of electrocatalytic interest (Kessler et al.) 315
Sulphydryl compounds,
chemically modified electrodes with affinity to ——— (Katz, Solov'ev) 217
Surface plasmon,
study of thin films of Prussian Blue on gold electrodes, using ———–polaritons (Cowen et al.) 455

Tryptophan,
study of the electrochemistry of ———, peptides containing tryptophan, and related compounds (indoles) at mercury electrodes (Tucker et al.) 127

Vanadium-EDTA complexes,
comparison of the polarographic catalytic currents of V(III)-EDTA/NO_3^- with those of V(IV)-EDTA/NO_3^- (Kato, Aoki) 309
Vinyl compounds,
correlation of anodic peak potentials with the semi-empirical orbital and HOMO energies of various ——— (Yılmaz et al.) 105
